

AMENDMENT TO THE CLAIMS

1. (Currently Amended) A therapeutic composition comprising a polypeptide comprising a therapeutically active portion of a lysyl oxidase pro-peptide, said polypeptide being in a pharmaceutically acceptable carrier substance therefore, wherein said lysyl oxidase pro-peptide portion of said polypeptide is therapeutically active in inhibiting cell growth or proliferation, and wherein said polypeptide does not have lysyl oxidase catalytic activity, and wherein said lysyl oxidase pro-peptide portion of said polypeptide is that of human, mouse or rat.
2. (Original) The therapeutic composition of claim 1, wherein said polypeptide is active in inhibiting cell growth in soft agar.
3. (Original) The therapeutic composition of claim 1, wherein said polypeptide is active in inhibiting tumor formation.
4. (Currently Amended) The therapeutic composition of claim 1, comprising a polypeptide comprising a therapeutically active portion of a lysyl oxidase pro-peptide having the amino acid sequence of SEQ ID NO.: 1 or SEQ ID NO.: 2, or conservative substitutions thereof, wherein said polypeptide is active in inhibiting cell growth or proliferation and wherein said polypeptide does not have lysyl oxidase catalytic activity.
5. (Currently Amended) The therapeutic composition of claim 1, comprising a polypeptide comprising a therapeutically active portion of a lysyl oxidase pro-peptide having the amino acid sequence selected from the group consisting of SEQ ID NOS:3, 4, 5,

6, 7 and 8, ~~or conservative substitutions thereof~~, wherein said polypeptide is active in inhibiting cell growth or proliferation and wherein said polypeptide does not have lysyl oxidase catalytic activity.

6. (Cancelled)

7. (Cancelled)

8. (Withdrawn) A method of treating a patient, said method comprising the steps of:

providing a patient suffering from cancer; and
administering to said patient a therapeutically effective amount of the composition of claim 1.

9. (Withdrawn) The method of claim 8, wherein said patient suffers from a form of cancer dependent on ras signaling for cell transformation.

10. (Withdrawn) A method of treating a patient, said method comprising the steps of:

providing a patient suffering from a disease or disorder that occurs via elevated ras-dependent signaling; and
administering to said patient a therapeutically effective amount of the composition of claim 1.

11. (Withdrawn) The method of claim 9, wherein said patient suffers from colon, breast, lung or prostate cancer.

12. (Withdrawn) The method of claim 10, wherein said disease or disorder is selected from the group consisting of diseases or disorders of the kidney, cardiovascular system and immune system.

13. (Withdrawn) The method of claim 10, wherein said patient suffers from a bone disease.

14. (Withdrawn) The method of claim 13, wherein said bone disease is an osteopenic condition.

15. (Withdrawn) The method of claim 14, wherein said bone disease is osteoporosis.
